Natural Antibiotics: Powerful Antibiotics that Don't Require Prescription

Many people have been practicing natural medicines for ages. A long time ago, when there was no concept of technology, medical experts and their patients dwell on herbal medicines and natural techniques for treating illness and healing injuries. From minor diseases to the threatening cancer, heart disease and diabetes, everything was successfully treated and cured without the modern equipment of medical science.

Herbal antibiotics have been used by herbal healers to eradicate flu, cold, infections and wounds. The reason why they are being taken back into the mainstream as alternatives to modern medicine is due to the fact that the bacteria have become highly resistant and powerful against synthetic medicines and antibiotics. However, all bacteria are not harmful, instead, they are important for body growth and survival in different environments.
