Autonomous Cooperation and Control in Logistics: Contributions and Limitations - Theoretical and Practical Perspectives

Autonomous Cooperation and Control in Logistics: Contributions and Limitations - Theoretical and Practical Perspectives

Many new technologies – like RFID, GPS, and sensor networks – that dominate innovative developments in logistics are based on the idea of autonomous cooperation and control. This self-organisational concept describes „...processes of decentralized decision-making in heterarchical structures. It presumes interacting elements in non-deterministic systems, which possess the capability and possibility to render decisions. The objective of autonomous cooperation and control is the achievement of increased robustness and positive emergence of the total system due to distributed and flexible coping with dynamics and complexity“ (Hülsmann & Windt, 2007). In order to underlie these technology-driven developments with a fundamental theoretical foundation this edited volume asks for contributions and limitations of applying the principles of autonomous cooperation and control to logistics processes and systems. It intends to identify, describe, and explain – in the context of production and distribution logistics – the effects on performance and robustness, the enablers and impediments for the feasibility, the essential cause-effect-relations, etc. of concepts, methods, technologies, and routines of autonomous cooperation and control in logistics. Therefore, the analyses collected in this edited volume aim to develop a framework for finding the optimal degree as well as the upper and lower boundaries of autonomous cooperation and control of logistics processes from the different perspectives of production technology, electronics and communication engineering, informatics and mathematics, as well as management sciences and economics.

From reader reviews:

Sheryl Hicks:

What do you in relation to book? It is not important along? Or just adding material if you want something to explain what the one you have problem? How about your free time? Or are you busy individual? If you don't have spare time to do others business, it is give you a sense of feeling bored faster. And you have extra time? What did you do? Every person has many questions above. The doctor has to answer that question simply because just their can do that. It said that about book. Book is familiar on every person. Yes, it is proper. Because start from on jardín de infancia until university need this Autonomous Cooperation and Control in Logistics: Contributions and Limitations - Theoretical and Practical Perspectives to read.

Shanon Stephens:

This Autonomous Cooperation and Control in Logistics: Contributions and Limitations - Theoretical and Practical Perspectives book is simply not ordinary book, you have after that it the world is in your hands. The benefit you have by reading this book is usually information inside this publication incredible fresh, you will get info which is getting deeper an individual read a lot of information you will get. This particular Autonomous Cooperation and Control in Logistics: Contributions and Limitations - Theoretical and Practical Perspectives without we realize teach the one who reading it become critical in thinking and analyzing. Don't end up being worry Autonomous Cooperation and Control in Logistics: Contributions and Limitations - Theoretical and Practical Perspectives can bring once you are and not make your case space or bookshelves' turn out to be full because you can have it in the lovely laptop even cellphone. This Autonomous Cooperation and Control in Logistics: Contributions and Limitations - Theoretical and Practical Perspectives having very good arrangement in word and also layout, so you will not sense uninterested in reading.

Margaret Cardwell:

Spent a free the perfect time to be fun activity to accomplish! A lot of people spent their leisure time with their family, or all their friends. Usually they undertaking activity like watching television, gonna beach, or picnic within the park. They actually doing ditto every week. Do you feel it? Do you need to something different to fill your own personal free time/ holiday? Could be reading a book could be option to fill your no cost time/ holiday. The first thing you will ask may be what kinds of e-book that you should read. If you want to consider look for book, may be the guide untitled Autonomous Cooperation and Control in Logistics: Contributions and Limitations - Theoretical and Practical Perspectives can be good book to read. May be it might be best activity to you.

Juan Turgeon:

Playing with family in the park, coming to see the ocean world or hanging out with close friends is thing that usually you have done when you have spare time, and then why you don't try point that really opposite from that. One particular activity that make you not experiencing tired but still relaxing, trilling like on roller

coaster you have been ride on and with addition associated with. Even you love Autonomous Cooperation and Control in Logistics: Contributions and Limitations - Theoretical and Practical Perspectives, you can enjoy both. It is great combination right, you still need to miss it? What kind of hang type is it? Oh occur its mind hangout people. What? Still don't understand it, oh come on its identified as reading friends.
