Whereas Newton's method involves only the first derivative, methods discussed in this chapter involve the second or higher. The "classical" methods of this type (such as Halley's, Euler's, Hansen and Patrick's, Ostrowski's, Cauchy's and Chebyshev's) are all third order with three evaluations, so are slightly more efficient than Newton's method. Convergence of some of these methods is discussed, as well as composite variations (some of which have fairly high efficiency). We describe special methods for multiple roots, simultaneous or interval methods, and acceleration techniques. We treat Laguerre's method, which is known to be globally convergent for all-real-roots. The Cluster-Adapted Method is useful for multiple or near-multiple roots. Several composite methods are discussed, as well as methods using determinants or various types of interpolation, and Schroeder's method.

From reader reviews:

Jacqueline Gore:

Have you spare time for a day? What do you do when you have considerably more or little spare time? Sure, you can choose the suitable activity intended for spend your time. Any person spent all their spare time to take a go walking, shopping, or went to the particular Mall. How about open or perhaps read a book allowed Numerical Methods for Roots of Polynomials - Part II: Chapter 9. Methods Involving Second or Higher Derivatives (Studies in Computational Mathematics)? Maybe it is for being best activity for you. You realize beside you can spend your time with your favorite's book, you can better than before. Do you agree with their opinion or you have other opinion?

Joseph Curtis:

Book is to be different for each grade. Book for children until eventually adult are different content. To be sure that book is very important for us. The book Numerical Methods for Roots of Polynomials - Part II: Chapter 9. Methods Involving Second or Higher Derivatives (Studies in Computational Mathematics) ended up being making you to know about other knowledge and of course you can take more information. It doesn't matter what advantages for you. The e-book Numerical Methods for Roots of Polynomials - Part II: Chapter 9. Methods Involving Second or Higher Derivatives (Studies in Computational Mathematics) is not only giving you far more new information but also for being your friend when you truly feel bored. You can spend your own personal spend time to read your reserve. Try to make relationship with the book Numerical Methods for Roots of Polynomials - Part II: Chapter 9. Methods Involving Second or Higher Derivatives (Studies in Computational Mathematics). You never sense lose out for everything if you read some books.

Stacey Eades:

Exactly why? Because this Numerical Methods for Roots of Polynomials - Part II: Chapter 9. Methods Involving Second or Higher Derivatives (Studies in Computational Mathematics) is an unordinary book that the inside of the publication waiting for you to snap it but latter it will zap you with the secret it inside. Reading this book alongside it was fantastic author who else write the book in such remarkable way makes the content on the inside easier to understand, entertaining technique but still convey the meaning thoroughly. So , it is good for you for not hesitating having this any longer or you going to regret it. This phenomenal book will give you a lot of rewards than the other book include such as help improving your proficiency and your critical thinking technique. So , still want to hesitate having that book? If I were being you I will go to the publication store hurriedly.

Tiffany Lyons:

Playing with family in a very park, coming to see the sea world or hanging out with pals is thing that usually you may have done when you have spare time, subsequently why you don't try issue that really opposite

from that. One activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you have been ride on and with addition associated with. Even you love Numerical Methods for Roots of Polynomials - Part II: Chapter 9. Methods Involving Second or Higher Derivatives (Studies in Computational Mathematics), you may enjoy both. It is excellent combination right, you still would like to miss it? What kind of hangout type is it? Oh occur its mind hangout men. What? Still don't have it, oh come on its named reading friends.
