What Men Hate About Women - Female Wolf Packs... PAY CLOSE ATTENTION, LADIES! In behavioral science we distinguish between reaction versus interaction by the way the human mind utilizes both attributes. Reaction takes place in the conscious mind and is a response that generally does not utilize thought. A good example of this is FEAR. Fear is a conscious mind reaction to being without control. Interaction takes place in the subconscious mind and does utilize the thought processes both empirical thought as well as experiential thought. A good example of interaction is LOVE. What both males and females crave is true and abiding love; one that is communal in nature or where you are "one" with someone. Counterfeit love or what is known as "LUST" practices "companionship" rather than communion or to be "with" someone rather than be one with someone. What men hate about women is about male interactions with women that most women would not even think about. Do men hate women? I am sure there are men that do hate women but in general the answer is "NO"! But there are traits that women constantly display that are called "the man repeller." These are discussed in this book along with trends men hate and dating advice. A man looking for a woman knows what he wants and needs when he sees it. Personals aside, a man may not be able to write down his wants and needs from a woman but he does know. The interviews are taken from actual cases studies and are eye-opening. Ladies - read this book!
