Group Decision Making under Multiple Criteria: Methods and Applications (Lecture Notes in Economics and Mathematical Systems) Ching-Lai Hwang, Ming-Jeng Lin

This monograph is intended for an advanced undergraduate or graduate course of engineering and management science, as well as for persons in business, industry, military or in any field, who want an introductory and a capsule look into the methods of group decision making under multiple criteria. This is a sequel to our previous works entitled "Multiple Objective Decision Making--Methods and Applications (No. 164 of the Lecture Notes), and "Multiple Attribute Decision Making--Methods and Applications (No. 186 of the Lecture Notes). Moving from a single decision maker (the consideration of Lecture Notes 164 and 186) to a multiple decision maker setting introduces a great deal of complexity into the analysis. The problem is no longer the selection of the most preferred alternative among the nondominated solutions according to one individual's (single decision maker's) preference structure. The analysis is extended to account for the conflicts among different interest groups who have different objectives, goals, and so forth. Group decision making under multiple criteria includes such diverse and interconnected fields as preference analysis, utility theory, social choice theory, committee decision theory, theory of voting, game theory, expert evaluation analysis, aggregation of qualitative factors, economic equilibrium theory, etc; these are simplified and systematically classified for beginners. This work is to provide readers with a capsule look into the existing methods, their characteristics, and applicability in the complexity of group decision making.

From reader reviews:

Ollie Johnson:

This book untitled Group Decision Making under Multiple Criteria: Methods and Applications (Lecture Notes in Economics and Mathematical Systems) to be one of several books which best seller in this year, honestly, that is because when you read this publication you can get a lot of benefit upon it. You will easily to buy this book in the book store or you can order it by using online. The publisher of the book sells the e-book too. It makes you more readily to read this book, because you can read this book in your Mobile phone. So there is no reason to you personally to past this guide from your list.

Mary Jones:

Reading a guide can be one of a lot of activity that everyone in the world likes. Do you like reading book consequently. There are a lot of reasons why people like it. First reading a e-book will give you a lot of new details. When you read a book you will get new information due to the fact book is one of several ways to share the information or even their idea. Second, reading through a book will make an individual more imaginative. When you reading through a book especially tale fantasy book the author will bring you to definitely imagine the story how the characters do it anything. Third, you may share your knowledge to others. When you read this Group Decision Making under Multiple Criteria: Methods and Applications (Lecture Notes in Economics and Mathematical Systems), you may tells your family, friends in addition to soon about yours guide. Your knowledge can inspire average, make them reading a e-book.

Marlyn Melia:

Typically the book Group Decision Making under Multiple Criteria: Methods and Applications (Lecture Notes in Economics and Mathematical Systems) has a lot of information on it. So when you check out this book you can get a lot of help. The book was published by the very famous author. Tom makes some research prior to write this book. This kind of book very easy to read you will get the point easily after scanning this book.

Robert Burmeister:

Would you one of the book lovers? If so, do you ever feeling doubt while you are in the book store? Try and pick one book that you find out the inside because don't assess book by its protect may doesn't work the following is difficult job because you are scared that the inside maybe not as fantastic as in the outside look likes. Maybe you answer can be Group Decision Making under Multiple Criteria: Methods and Applications (Lecture Notes in Economics and Mathematical Systems) why because the excellent cover that make you consider concerning the content will not disappoint anyone. The inside or content is actually fantastic as the outside or perhaps cover. Your reading 6th sense will directly guide you to pick up this book.
