Deploying and Managing Microsoft .NET Web Farms

Barry BA Bloom

Deploying and Managing Microsoft .NET Web Farms Barry BA Bloom

Microsoft .NET Web Farms describes the life cycle of Microsoft .NET e-business applications and the steps an organization will take as they grow their online presence.

Detailed descriptions of technology choices an organization makes will save time, effort, and money. In-depth analysis of software technologies used includes Application Center, Network Load Balancing Services (NLBS), Component Load Balancing (CLB), COM+, Firewalls, Cluster Server, useful 3rd party technologies and other key Microsoft .NET components. Finally a hardware roadmap will explore technologies like caching servers, load balancing devices, and others. These hardware and software roadmaps will culminate in a detailed topology of a successful e-business application deployment based on real-world experience.
