Mystery of the Dyatlov Pass: (true mystery, true crime, murder, historical mystery) DON'T GO THERE Svetlana Oss

All of Russia knows the story. Nobody knows the truth.

Nine wholesome University students mountaineering in the Urals go missing, and are later uncovered from the snows of a bleak forest's edge in the Siberian Taiga, in a series of grisly discoveries. Why were the climbers wearing no boots? Why were stout branches of the forest pines singed to a height of thirty feet? What were the mysterious markings in the bark of nearby trees? What was so-called "overwhelming force" that was capable of breaking eight ribs in a single blow without bruises? Why the KGB infiltrated all the search parties and attended the funerals? Why the clothes were tested for radiation?

The authoritative book - by international author and investigative journalist: Svetlana Oss

(Osadchuk) who has been the leading commentator of this profound mystery since Moscow Times first sponsored her 2007-2008 investigation. The savage events of 1st February 1959, which took nine lives and left a trail of smashed and semi-naked bodies across the slopes of Mount Ortoten, have confounded every credible explanation. Wild and convincing theories abound. All of them are flawed by the facts. Was it sex? Was it hypothermia? Was it robbers?

In the first reportage to be published in the English language, The Moscow Times' meticulous coverage presented the existing versions that have proliferated over fifty years, carefully sifting each idea, from mad guesses by superstitious nuts, to reasoned findings of the official investigation.

Now Svetlana Oss formulates the true answer.

'Don't go there' explains for the first time how this odyssey by nine seasoned climbers, nine experienced members of the Ekaterinburg University Climbing Society came to end in disaster.

New information, new analysis, new brains - the answer will astound you.

"I am sure that nothing else that I have written has ever made such a noise in the world, and no wonder. This mystery has an invariable and puzzling quirk: at least one circumstance is inevitably contradicted by some other. Not a single explanation out of the many is able to conquer the riddle – there is always at least one fact that completely ruins whatever theory one prefers. This excites people. It excites me."
