Towards Green Marine Technology and Transport

Towards Green Marine Technology and Transport

Towards Green Marine Technology and Transport covers recent developments in marine technology and transport. The book brings together a selection of papers reflecting fundamental areas of recent research and development in the fields of ship hydrodynamics, marine structures, ship design, shipyard technology, ship machinery, maritime transportation, and safety and reliability. Issues such as the environment, renewable energy, wave and wind modeling, coastal engineering, fisheries and legal maritime aspects are also addressed.

Towards Green Marine Technology and Transport is intended for academics and professionals involved in the development of marine technology and transport.
