Programming Computer Vision with Python: Tools and algorithms for analyzing images

Jan Erik Solem

Programming Computer Vision with Python: Tools and algorithms for analyzing images Jan Erik Solem

If you want a basic understanding of computer vision's underlying theory and algorithms, this hands-on introduction is the ideal place to start. You'll learn techniques for object recognition, 3D reconstruction, stereo imaging, augmented reality, and other computer vision applications as you follow clear examples written in Python.

Programming Computer Vision with Python explains computer vision in broad terms that won't bog you down in theory. You get complete code samples with explanations on how to reproduce and build upon each example, along with exercises to help you apply what you've learned. This book is ideal for students, researchers, and enthusiasts with basic programming and standard mathematical skills.

- Learn techniques used in robot navigation, medical image analysis, and other computer vision applications
- Work with image mappings and transforms, such as texture warping and panorama creation
- Compute 3D reconstructions from several images of the same scene
- Organize images based on similarity or content, using clustering methods
- Build efficient image retrieval techniques to search for images based on visual content
- Use algorithms to classify image content and recognize objects
- Access the popular OpenCV library through a Python interface

From reader reviews:

Marcus Casale:

Reading can called brain hangout, why? Because when you find yourself reading a book especially book entitled Programming Computer Vision with Python: Tools and algorithms for analyzing images your mind will drift away trough every dimension, wandering in every aspect that maybe not known for but surely can be your mind friends. Imaging just about every word written in a reserve then become one form conclusion and explanation in which maybe you never get before. The Programming Computer Vision with Python: Tools and algorithms for analyzing images giving you an additional experience more than blown away your mind but also giving you useful details for your better life with this era. So now let us explain to you the relaxing pattern this is your body and mind is going to be pleased when you are finished studying it, like winning a casino game. Do you want to try this extraordinary shelling out spare time activity?

Carol Ray:

This Programming Computer Vision with Python: Tools and algorithms for analyzing images is brand new way for you who has curiosity to look for some information as it relief your hunger associated with. Getting deeper you onto it getting knowledge more you know or you who still having small amount of digest in reading this Programming Computer Vision with Python: Tools and algorithms for analyzing images can be the light food to suit your needs because the information inside this kind of book is easy to get by means of anyone. These books build itself in the form which can be reachable by anyone, yes I mean in the e-book application form. People who think that in reserve form make them feel tired even dizzy this reserve is the answer. So there is no in reading a guide especially this one. You can find what you are looking for. It should be here for anyone. So , don't miss the idea! Just read this e-book type for your better life in addition to knowledge.

Calvin Copher:

As we know that book is very important thing to add our understanding for everything. By a e-book we can know everything we really wish for. A book is a list of written, printed, illustrated as well as blank sheet. Every year had been exactly added. This guide Programming Computer Vision with Python: Tools and algorithms for analyzing images was filled in relation to science. Spend your extra time to add your knowledge about your technology competence. Some people has various feel when they reading any book. If you know how big selling point of a book, you can truly feel enjoy to read a book. In the modern era like today, many ways to get book that you simply wanted.

Troy Kemp:

A lot of book has printed but it is unique. You can get it by online on social media. You can choose the most beneficial book for you, science, comic, novel, or whatever by simply searching from it. It is named of book Programming Computer Vision with Python: Tools and algorithms for analyzing images. You can include

your knowledge by it. Without leaving behind the printed book, it could possibly add your knowledge and make anyone happier to read. It is most important that, you must aware about e-book. It can bring you from one destination to other place.
