Extreme Learning Machines 2013: Algorithms and Applications (Adaptation, Learning, and Optimization)

Extreme Learning Machines 2013: Algorithms and Applications (Adaptation, Learning, and Optimization)

In recent years, ELM has emerged as a revolutionary technique of computational intelligence, and has attracted considerable attentions. An extreme learning machine (ELM) is a single layer feed-forward neural network alike learning system, whose connections from the input layer to the hidden layer are randomly generated, while the connections from the hidden layer to the output layer are learned through linear learning methods. The outstanding merits of extreme learning machine (ELM) are its fast learning speed, trivial human intervene and high scalability.

This book contains some selected papers from the International Conference on Extreme Learning Machine 2013, which was held in Beijing China, October 15-17, 2013. This conference aims to bring together the researchers and practitioners of extreme learning machine from a variety of fields including artificial intelligence, biomedical engineering and bioinformatics, system modelling and control, and signal and image processing, to promote research and discussions of "learning without iterative tuning".

This book covers algorithms and applications of ELM. It gives readers a glance of the newest developments of ELM.

From reader reviews:

Phillip Barker:

Have you spare time to get a day? What do you do when you have much more or little spare time? Yeah, you can choose the suitable activity to get spend your time. Any person spent their very own spare time to take a stroll, shopping, or went to the Mall. How about open or even read a book allowed Extreme Learning Machines 2013: Algorithms and Applications (Adaptation, Learning, and Optimization)? Maybe it is being best activity for you. You understand beside you can spend your time together with your favorite's book, you can cleverer than before. Do you agree with its opinion or you have other opinion?

Micheal Mata:

The book Extreme Learning Machines 2013: Algorithms and Applications (Adaptation, Learning, and Optimization) make one feel enjoy for your spare time. You can use to make your capable more increase. Book can for being your best friend when you getting strain or having big problem with your subject. If you can make reading a book Extreme Learning Machines 2013: Algorithms and Applications (Adaptation, Learning, and Optimization) to be your habit, you can get far more advantages, like add your capable, increase your knowledge about many or all subjects. You may know everything if you like available and read a e-book Extreme Learning Machines 2013: Algorithms and Applications (Adaptation, Learning, and Optimization). Kinds of book are several. It means that, science guide or encyclopedia or other people. So , how do you think about this e-book?

Sandra Romero:

What do you think about book? It is just for students since they are still students or the idea for all people in the world, what the best subject for that? Just simply you can be answered for that query above. Every person has several personality and hobby per other. Don't to be obligated someone or something that they don't want do that. You must know how great and also important the book Extreme Learning Machines 2013: Algorithms and Applications (Adaptation, Learning, and Optimization). All type of book would you see on many sources. You can look for the internet methods or other social media.

John Hawkins:

Are you kind of occupied person, only have 10 as well as 15 minute in your day time to upgrading your mind talent or thinking skill also analytical thinking? Then you are having problem with the book than can satisfy your short time to read it because all this time you only find guide that need more time to be read. Extreme Learning Machines 2013: Algorithms and Applications (Adaptation, Learning, and Optimization) can be your answer mainly because it can be read by you actually who have those short extra time problems.
