**Robots in Academic Libraries: Advancements in Library Automation (Advanced in Library & Information Science)** Edward Iglesias

In recent years, automation has played a vital role in library systems that handle tasks of acquisition, cataloging, serials, and circulation. The automation of these operations has, in turn, minimized the demand for human interaction.

**Robots in Academic Libraries: Advancements in Library Automation** provides an overview on the current state of library automation, addresses the need for changing personnel to accommodate these changes, and assesses the future for academic libraries as a whole. This book is essential for library leaders, technology experts, and library vendors interested in the future of library automation and its impact on the decline of human interaction in libraries.
