## **Standard Handbook Oil Spill Environmental Forensics: Fingerprinting and Source Identification**

Scott Stout, Zhendi Wang

*Standard Handbook Oil Spill Environmental Forensics: Fingerprinting and Source Identification, Second Edition*, provides users with the latest information on the tools and methods that have become popular over the past ten years.

The book presents practitioners with the latest environmental forensics techniques and best practices for quickly identifying the sources of spills, how to form an effective response, and how to determine liability. This second edition represents a complete overhaul of the existing chapters, and includes 13 new chapters on methods and applications, such as emerging application of PAH isomers in oil spill forensics, development and application of computerized oil spill identification (COSI), and fingerprinting of oil in biological and passive sampling devices.

- Contains 13 new chapters on methods and applications, including emerging application of PAH isomers in oil spill forensics, the development and application of computerized oil spill identification (COSI), and the fingerprinting of oil in biological and passive sampling devices
- Presents the latest technology and methods in biodegradation of oil hydrocarbons and its implications for source identification, surface trajectory modeling of marine oil spills, and identification of hydrocarbons in biological samples for source determination
- Contains new case studies to illustrate key applications, methods, and techniques
