Colleen Flood

International Health Care Reform: A Legal, Economic and Political Analysis (Routledge Studies in the Modern World Economy) Colleen Flood

This book analyses the wave of competition-oriented reform by comparing "internal market reform" (proposed in publicly-funded health care systems) with "managed competition reform" (proposed in systems with a mixture of public/private financing) and the role of "managed care" in each of these reform theories. *International Health Care Reform* clearly explains the arguments in economics and justice for intervention by governments in health care markets; the structure and dynamics of health care systems; and the features of competition-oriented reform models. The book will appeal to students and researchers involved in health policy studies, public health and health economics. It will also be a valuable read for policy-makers internationally.
